

BEHAVIOURAL VARIANT FRONTOTEMPORAL DEMENTIA

CLINICAL STUDY:

Box Hill Hospital is conducting a clinical trial to test to a potential new drug to treat behavioural variant Frontotemporal Dementia.

The study will require 10 visits to the clinic over a period of approximately 60 weeks.

Patients will benefit from a comprehensive health screen and memory assessment. Travel expenses or transport will be provided.

If you are interested in taking part and would like more information about the study and eligibility requirements, please contact:
